ANVIL RINGS and ANVIL RING ASSEMBLIES

Did You Know . . .

- . . . The anvil roll and anvil rings do 50% of the work cutting shingles?
- . . . Regular maintenance of anvil rings and anvil roll assemblies will minimize cutting cylinder maintenance and replacement costs?
- . . . A set of shingle knives is only as good as the anvil rings and anvil roll assembly they cut against?

Grooves in anvil rings are the worst enemy of shingle knives and cutting cylinders. Ask any shingle cutter operator, and they will tell you that they can "make" a set of shingle knives cut when the anvil rings are worn and grooved. It's just that they will have more problems more often and the shingle knives/cutting cylinder will have to be changed more and more frequently.

What is the cost of changing a cutting cylinder and replacing prematurely worn-out shingle knives? Add it up:

- Downtime to remove the cutting cylinder with the used shingle knives and install another re-knifed cutting cylinder.
- Labor to disassemble, clean, inspect, and re-knife the cutting cylinder just removed.
- The price of the Shingle Knife Set, (which is actually very small compared to the labor cost).

“Your Partner in Productivity”

Avoid these operating problems! Use quality anvil rings from Reichel & Drews, Inc. made from bearing grade tool steel, precision machined, through hardened, and precision ground for maximum performance. **And use your determination to replace used, worn anvil rings when they need replacing!**

Our carbide anvil rings are available in all sizes making Reichel & Drews your single source for complete sets of anvil rings.

***Call today to place your order
or request a quotation!***

630-773-2500

Use our ***"Make & Hold Program"*** to ensure a new set of anvil rings is available whenever you need them.

Don't forget maintenance or replacement of the anvil core. Pay particular attention to diameters and concentricity of the face and journals.
